Atlanta, GA

**PORTFOLIO WEBSITE:** <https://portfolio.matthewjinks.com>

**GITHUB:** <https://github.com/mattjinks>

## EDUCATION

---

**Georgia Institute of Technology** – Bachelor of Science, Computer Science

December 2023

Atlanta, GA

## PROJECT EXPERIENCE

---

**Slow + Reverb Music** <https://portfolio.matthewjinks.com/cloud-project>

**2024**

Software Development with Cloud Services

- Developed unique microservices-based music streaming web application, featuring slow and reverb audio effects to deliver unique listening experiences tailored to the popular “Slowed + Reverb” music trend
- Leveraged Microsoft Azure’s cloud services for backend infrastructure including Azure SQL Database, Azure functions, Azure API Management, Azure Container Registry, Azure Web App, & Blob Storage
- Implemented CI/CD pipeline using Azure Pipelines ensuring consistent, automated Docker builds and deployments to Azure Web App
- Created a robust front-end design with modular Angular Components, enabling effective data binding and reusable UI components across the application
- Integrated Web Audio API for custom audio processing

**Online Store Backend** <https://portfolio.matthewjinks.com/storefront-backend-project>

**2024**

Backend Development

- Designed and implemented a secure backend API for an online store, managing all aspects from database schema design to API endpoint implementation
- Developed robust authentication and authorization mechanisms using JWTs and bcrypt for password hashing, enhancing security measures for user data protection
- Conducted extensive unit testing using Jasmine to ensure the reliability and functionality of CRUD operations
- Employed Express to create RESTful API endpoints and integrated PostgreSQL for data management, leveraging db-migrate for structured database migrations.

## WORK EXPERIENCE

---

**Georgia Tech Research Institute**

**Atlanta, GA**

Full Stack Software Engineering CO-OP

May 2018-December 2019

- Created hundreds of RESTful API tests that exposed critical defects and ensured reliable code
- Discovered and fixed multiple server errors that prevented modules from operating as intended
- Implemented server-side password validation procedures to prevent bypasses by malicious users
- Leveraged knowledge in Angular, Client-Service architecture, RESTful API, and Git to accomplish tasks
