Bachelor of Science in Computer Science

Atlanta, GA

I believe I am a strong candidate for the **Junior Software Engineer** position at ManTech. With a Bachelor of Science in Computer Science from Georgia Institute of Technology, coupled with an active **Secret Government Security Clearance**, I am enthusiastic about the opportunity to contribute to national security and innovative projects at ManTech.

My academic and project experiences have equipped me with a robust foundation in several key areas relevant to the responsibilities of this role:

- **Designing and implementing secure backend APIs** for an e-commerce platform, emphasizing authentication, authorization, and data protection.

- **Developing a microservices-based music streaming application** with a robust front-end using Angular, HTML, CSS, and TypeScript.

- **Implementing a CI/CD pipeline** using Azure Pipelines, showcasing my understanding of automation and deployment processes.

- **Collaborating on a comprehensive Cloud Security Policy** for a financial institution, ensuring compliance with industry standards and regulation.

My strong foundation in Java, JavaScript, TypeScript, and Angular, coupled with my experience with Docker and cloud technologies, equips me to tackle the challenges of building and maintaining software and web applications in a national security context. My experience with Azure pipelines demonstrates my familiarity with CI/CD principles and automation.

I am excited about the opportunity to join ManTech and contribute to your mission of protecting national and homeland security through innovative technology solutions.

Sincerely,

Matthew Jinks
